Become a UBTECH TITAN

THE Mission OF UINTAH BASIN TECHNICAL COLLEGE is to provide technical education and training for secondary and adult students, to fulfill labor market needs, and promote economic development in the Uintah Basin.

1. Choose a Program

Not sure which program to choose? No problem! Meet with a Student Success Advisor.

ASK US ABOUT HYBRID OPTIONS!

2. Schedule an Appointment

Meet with a Student Success Advisor to get all testing and admission tasks taken care of. Schedule online at ***ubtech.edu/admissions***

ROOSEVELT CAMPUS
Student Success Advisor | 435.722.6914

VERNAL CAMPUS
Student Success Advisor | 435.725.7102
Student Success Advisor | 435.725.7137

3. Secure Funding

Available funding options:

- Scholarship
- Employer Sponsorship
- VA Educational Benefits
- Self-pay
- Pell Grants
- Workforce Services
- Vocational Rehabilitation Services
- Ute Indian Tribal Education Benefits

4. Enroll

Meet with the Registrar at Titan Headquarters of either campus to pay your tuition and applicable fees. Business hours on both campuses are:
Mon - Thurs 7:30am - 5:00pm | Fri 7:30am - 12:00pm

ROOSEVELT CAMPUS
435.722.6900 | 1100 E. Lagoon St.

VERNAL CAMPUS
435.725.7100 | 450 N. 2000 W.

TITAN HEADQUARTERS

CAREER COUNSELING is offered to anyone considering classes at UBTech. Call a Student Success Advisor for more information.

The Titan Headquarters can help individuals to succeed in their choice of academic studies by providing a variety of testing services.
Contact a Student Success Advisor to schedule a test.
The Testing Center is an authorized site for the following organizations:

- ASE Prometric
- Utah Nursing Assistant Registry
- Rocky Mountain Gas Association (RMGA)
- YouScience
- Pearson Vue

REGISTRATION AND TUITION

Class times vary. See the individual class/program for specific details. Tuition costs vary for all programs/courses. The costs for individual scheduled courses are listed in this bulletin. Books and supplies are in addition to tuition costs. See the Registrar for details.

UBTech does not discriminate on the basis of race, color, national origin, sex, disability, age, religion, gentetic information, veteran status, gender identity or expression, or sexual orientation, in its programs and activities. *UBTech no discrimina basando en la raza, el color de piel, el origen nacional, el sexo, la discapacidad, la religion, a información genético, el estado de veterano, a identidad sexo o expresión, o orientación sexual en sus programas educativos y actividades.* **UBTech will take steps to assure that the lack of English skills will not be a barrier to admission and participation in all educational skills.**

The following person has been designated to handle inquiries regarding the non-discrimination policies:
Vice President of Student Affairs, 1100 East Lagoon Street, Roosevelt, Utah 84066, 435-722-6910.

DESCRIPTIONS

Automotive Programs:

Tire and Lube Technician is an entry level program designed to teach the skills essential to enter the field of automotive preventative services.

Automotive Maintenance & Light Repair prepares students with foundational skills and knowledge for entry-level employment as automotive technicians, with hands-on instruction in brakes; suspension and steering; electrical systems; and maintenance and light repair, along with an emphasis on safety and workplace professionalism.

Automotive Technology prepares students with diversified employment skills and knowledge as master automotive technicians, including hands-on instruction in brakes; suspension and steering; manual drivetrain and transaxles; electrical/electronic systems; engine performance; preventative maintenance; safety; professionalism; and workplace relations.

Cabinetry teachs the fundamentals of cabinet and furniture construction.

Construction Programs:

Carpentry Fundamentals provides students with an introduction to the various disciplines and occupations in the construction industry and prepares them for entry-level positions.

Construction Technology provides a comprehensive opportunity for students to gain knowledge and skills to gain entry into the construction industry.

Culinary Programs:

Line Cook trains students to learn effective skills to organize, prepare, and present hot and cold foods.

Culinary Arts teaches the fundamental principles and techniques of professional cooking and baking.

Electrical Programs:

Electrical Apprenticeship provides a solid understanding of the National Electrical Code (NEC), its layout, the requirements for different electrical systems, and the components of those systems.

Electrical Technician prepares students to apply technical knowledge and skills to assemble, install, operate, maintain, and repair electrically energized systems, such as residential, commercial, and industrial electric-power systems wiring, D.C. and A.C. motors, controls, and electrical distribution panels.

Farm/Ranch Management offers individualized continuing education for farmers and ranchers. Learn business management skills needed to analyze farm records and apply them to the individual operation. Participants are assisted in keeping a complete set of financial records using Microsoft Excel and Quicken and/or Quickbooks.

Diesel Programs:

Preventative Maintenance Technician gives students an overview of working in the heavy duty diesel industry.

Diesel Technician I prepares students for work in the industry as a diesel equipment technician.

Diesel Technician II prepares students for work in the industry as a diesel mechanic.

Information Technology Programs:

IT Support Technician receive training in both technical and soft skills in basic IT support, troubleshooting hardware and software issues, basic networking, and security.

Information Technology provides education and training in preparation for employment in Information Technology.

Networking and Cybersecurity provides education and training in preparation for careers in Information Technology and Cybersecurity.

Lineman Pre-Apprenticeship provides students with the essential knowledge and hands-on skills required for entry-level roles in the utility and electrical services industry.

Heath Professions Programs:

Medical Assistant prepares students for entry-level positions that will allow them to learn and move into higher-level job opportunities by working with physicians and providers in office settings.

Nursing Assistant is designed for students to receive their certification by completing coursework in classroom and clinical settings.

Pharmacy Technician prepares students to support pharmacists by performing a wide range of practice-related duties for community, institutional, compounding, long-term care, mail-order, and other pharmaceutical settings.

Phlebotomy provides students with the skills and knowledge needed to become competent phlebotomists.

Practical Nursing Students will gain essential nursing skills through classroom instruction, lab, simulations, and clinical practice. Graduates are prepared to take the NCLEX-PN exam and work as a Licensed Practical Nurse, with the option to pursue further education toward becoming a Registered Nurse.

Surgical Technology prepares you for employment as an entry-level surgical technologist (ST).

Nail Technician provides the skills needed to work in a beauty or nail salon performing services such as natural nail care, including manicures and pedicures, and nail enhancements. Instruction also includes sanitation, salon safety, nail and skin disorders, professional ethics and salon management, and licensing laws and rules.

POST (Peace Officer Standard Training) Programs:

Special Functions Officer (SFO) qualifies an individual to work in positions such as constables, auxiliary officers, bailiffs, reserve officers, and others. Consists primarily of criminal code, physical fitness, and arrest control, among others.

Basic Corrections Officer (BCO) builds upon skills and knowledge gained in the Special Function Officer program and provides basic training required for employment in the field of corrections.

Law Enforcement Officer (LEO) provides comprehensive training for those seeking a career as a certified peace officer with state, county, or municipal law enforcement agencies. Learn to perform duties such as enforcing laws, responding to emergencies, conducting investigations, and engaging with the community. Training includes criminal law, patrol procedures, firearms, defensive tactics, emergency vehicle operations, and report writing, among other essential topics. Pending COE Approval

Tower Technician trains students for entry level positions as tower technicians in the telecommunications infrastructure industry.

Transportation Programs:

Commercial Drivers License - Class A prepares students with the skills and knowledge they need to join the professional driving industry.

Commercial Drivers License - Class B prepares students with the skills and knowledge they need to join the professional driving industry.

Advanced Energy Transportation teachs students how to safely transport live loads, identify different types of long combination vehicles (LCV) and the coupling and uncoupling process of LCV.

Well Control Programs:

Well Control Supervisor accredited IADC course that meets the criteria to manage a drilling site. Using simulation to prepare students to ensure the safety of all crew members and learn drilling techniques.

Oil and Gas Operator Representative - Workover accredited IADC supervisory level course teachs students to operate safely in all aspects of workover operations, including wireline, coil tubing, and snubbing. .

Welding Programs:

Welding Basic Technician gives an overview of the welding industry, including familiarization with safety, welding machines, and processes. Skills taught include basic welding, basic pipe welding, and oxy-fuel cutting, preparing graduates to seek entry-level employment in welding.

Welding Technology students receive hands-on safety, welding, and cutting instruction on a variety of metals.

Scholarships Available!

TRANSPORTATION COURSES

AIRBRAKE WORKSHOP: Covers the inspection and adjustment of airbrakes.

DEFENSIVE DRIVING FOR PROFESSIONAL TRUCK DRIVERS: Designed for the CDL driver. Drivers learn to recognize potential hazards and learn best practices to promote safe driving skills.

DOT HM126 HAZARDOUS MATERIALS: Teaches the signage and handling/transporting of hazardous materials. 49 CFR 172.704. Entry Level Driver Training (ELDT) required before testing to receive a Hazmat Endorsement.

DOT LOG BOOK HOS: Designed for individuals and employers who need to know and discuss applicable DOT laws regarding hours of service regulations and proper log-book completion, including electronic logs.

SAFETY COURSES

AERIAL LIFT OPERATOR CERTIFICATION: 3 yr Certification, includes theory and practical training per OSHA requirements.

CONTRACTOR CONTINUING ED 6 HOURS (OR 3 HOURS): Coming fall 2027. General overview on code updates w/emphasis on local non-compliance issues designed to provide the continuing education required for contractors. Contact Kimberli Wadsworth for more information | 435.725.7110

CORE COMPLIANCE: A standardized program covering the health, safety and environmental training most requested by oilfield operators and host employers. Instructor-led training that is Safeland accredited and provides training beyond the awareness level for over 30 topics.

DEFENSIVE DRIVING PASSENGER CAR: This course offers practical strategies to reduce collision-related injuries, fatalities and cost by reinforcing good driving skills, putting defensive driving in a personal context and showing students the consequences of the choices they make behind the wheel.

EMERGENCY/FIRE & EVACUATION PLANNING: Provides training on determining if a workplace requires an emergency action plan. Development of and implementation of an emergency action and fire protection plans.

FORKLIFT OPERATOR CERTIFICATION (COUNTER BALANCE OR ROUGH TERRAIN): 3 yr Certification, includes theory and practical training per OSHA requirements.

HAZCOM GHS: Training on SDS sheets and Chemical Labeling mandate.

HEARING PROTECTION: Training on recognizing noise hazards, noise exposure control and selection and use of hearing protection.

HM126 HAZARDOUS MATERIALS: Teaches the signage and handling/transporting of hazardous materials. 49 CFR 172.704

HSI FIRST AID/CPR WITH AED: A combined adult first aid, AED, and CPR certification course designed for the occupational first aid provider.

INCIPIENT FIRE TRAINING (FIRE EXTINGUISHER): OSHA compliant incipient fire extinguisher training, includes theory and practical.

LOCKOUT/TAGOUT CONTROL OF HAZARDOUS ENERGY: Covers the types and detection of hazardous energy, control measures, and developing and implementing energy control programs.

OSHA 10 HR GENERAL INDUSTRY: Taught per OSHA requirements. Utilized by many industries in and out of the oil and gas industry.

H2S CLEAR FOR ENERGY
arms thousands of workers with crucial knowledge of the dangers of H2S and the precautions, tools, and storage tanks, tankers, and terminals.

VERIFORCE BASIC ORIENTATION 7.0 (SAFELAND): explains the hazards that workers may encounter in the oil and gas industry along with the various practices employed to mitigate those hazards. This SafeLandUSA and SafeGulf accredited one-day safety orientation also meets 30CFR 250 and API RP T-1 requirements. Students will also gain a clear understanding of their rights under OSHA and how those rights apply to their workplace.

WINTER DRIVING: Provides information and training for driving in adverse weather and how to prepare your vehicle for driving in winter conditions.
